AIRDOCK LEISURE

INFLATABLE PLATFORM

Have you always dreamt of owning a private island?

The Talamex Air-Dock leisure inflatable platform makes this wish come true. With its 4 metres length and 2 metres width, the platform has excellent dimensions for enjoying the water with a group. The island is manufactured of 0,7mm single layer drop-stitch PVC. The 20cm height prevents waves from rolling over the platform. The top is finished off with teak-look EVA foam which provides great grip and gives a luxurious look. By means of the eight soft handles on the sides, the platform is easy to move and the four SS D-rings on the

corners provide the ability to connect multiple platforms. On the bottom you'll find four wateranchors/ballastbags, these ensure stability and keep the platform at its place. Also on the bottom a SS D-ring is placed for attaching an anchor with line. Additionally the platform is equipped with two universal mounts for optionally adding a bathing ladder. In the standard package is among other: a repair kit, high-pressure hand pump with pressure gauge, two connection straps and a packing bag.

Comes without boarding ladder.
