AIRDOCK WORK

Talamex
INFLATABLE PLATFORMS

INFLATABLE PLATFORM

Yacht maintenance has never been easier. With the Talamex Air-Dock inflatable platform for work purposes you can easily polish, varnish, clean and varnish alongside your ship.

With its 4 metres length and 2 metres width, the platform is perfect for working with an entire team. The island is manufactured of 0,7mm single layer drop-stitch PVC. The 20cm height prevents waves from rolling over the platform. By means of the eight soft handles on the sides, the

platform is easy to move and the four SS D-rings on the corners provide the ability to connect multiple platforms. On the bottom you'll find four wateranchors/ballastbags, these ensure stability and keep the platform at its place. Also on the bottom a SS D-ring is placed for attaching an anchor with line.

In the standard package is among other: a repair kit, high-pressure hand pump with pressure gauge, two connection straps and a packing bag.

ArtikeInr.	Description	Length (cm)	Width (cm)	Height (cm)	Max. load (kg)	Max. number person	Weight (kg)	Packing size (cm)
